An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 61-89 to an invention non-elected without traverse. Accordingly, claims 61-89 have been cancelled.

On page 2 of the specification, line 5, --, Pat. No. 6,733,404,-- has been inserted before "entitled".

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose nor fairly suggest a bat including a frame and a tubular body coaxially aligned with the hitting portion of the frame of the tapered structure claimed wherein the tubular body is configured to move independently of the frame. Also, it is the examiner's opinion that the removal of material from a known constant wall thickness independently moveable insert on either side of the sweet spot of the bat in order to reduce weight would not have fairly suggested itself to the ordinarily skilled artisan. Furthermore, the test data on a bat including such a tubular body as discussed with reference to Fig. 5 shows a result that would not automatically be expected by the ordinarily skilled artisan removing material on either side of the center of the tubular body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Mark S. Graham at telephone number 571-272-4410.
